Hello,

I am seeking your advice, and possibly some materials to share with ODEQ.

ODEQ would like to see a NRRB package as it gears up for the Portland Harbor NRRB meeting this fall. We thought we would send them the Lower Duwamish package but Allison points out it is confidential, and not a good example. I have been directed to the 2 of you for possible packages to share with the state.

Today I learned that EPA keeps NRRB packages confidential as they are deliberative. This leaves me wondering what we might share with ODEQ besides information submitted by other states, such as the attached documents.

Do you have advice? Could we give DEQ employees a chance to review the information without sending files to them (in which case they would no longer be able to be held confidential)?

Thanks,
Debbie

Dear All,

I greatly apologize for the long delay in getting this information to you. Attached are documents prepared by Washington Dept of Ecology for the NRRB review of the Lower Duwamish Waterway. Unfortunately the LDW NRRB package is confidential and according to the project manager is not a good example. I have a query in to another RPM to find out if her package is available so you can see what she prepared.

Thanks,
Debbie
